

PRESS RELEASE

Release date: 3rd April 2014

Nmc – Copley announce the opening of a new 10,000 sq ft distribution warehouse.

Due to growing lack of space caused by an ever increasing product demand at our Leyburn and Tredegar premises, we have taken the decision to invest in the opening of a further warehouse at Brompton On Swale North Yorkshire.

The new warehouse will enable us to stock more Decoration product, thus reducing double handling of product from Tredegar to Leyburn.

When fully operational we will be producing our highly popular Pro – Cove and Harmony coving 6pks at Brompton which will enable our Architecture and Design business unit to become fully self sufficient.

Bruce Storr (Director) said “the main goals of the project are to improve our order turnaround, cut logistic costs and reduce our carbon footprint in line with our ongoing lean management programme”.
