## TECHNICAL

### MATERIALS

- HDPS

### MANUFACTURING PROCESS

- A technology patented by NMC, the High Definition Poly System (HDPS) delivers leading-edge architectural designs. Polymer extrusion makes it possible to manufacture a moulding under the effect of the heat and by the addition of an ecological propellant gas.
- The moulding and chair-rails are pre-coated with a base layer from a non toxic satin matt acrylic primer applied by spray.

- These products contain neither CFC's or HCFC's.

### PROPERTIES

- Resistance to deformation, exceptional dimensional definition.
- The acrylic primer assures optimal adhesion of the finishing coat.
- Surface tough, smooth and with precise edges.
- Gluing surfaces grooved to offer optimum bonding.

### SURFACE WORK

- The mouldings and chair-rails are primed to allow direct application of most paints.

## TECHNICAL DATA:

### MATERIALS

- High Density Polyurethane

### MANUFACTURING PROCESS

- Injection moulding made from two constituents
- The products are pre-coated with a base layer from a non-toxic satin matt acrylic primer applied by spray outer surface reinforced with a synthetic foil
- These products contain neither CFC's or HCFC's

### SURFACE WORK

- Can be painted with any interior paint

### PROPERTIES

- Very precise patterns and structure, with exceptional resistance to breaking and shocks
- The acrylic primer assures optimal adhesion of the finished coat
- Exposed surface reinforced with a synthetic film and coated in a matt white acrylic primer
- Rough back surface to offer optimum bonding

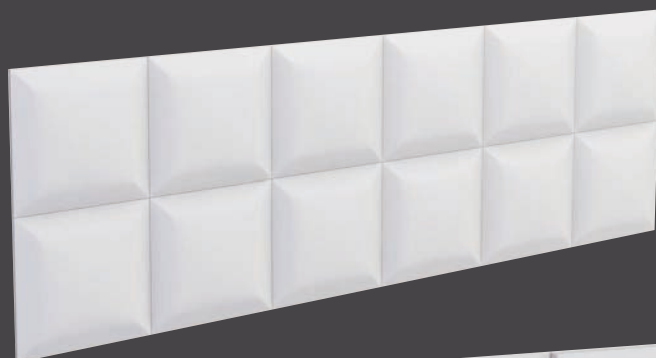

(N.B. All sizes are nominal and intended as a guide only)

## TECHNICAL DATA:

### MATERIALS

- Extruded polystyrene

### MANUFACTURING PROCESS

- Extrusion of the polystyrene (thermoplastic) which allows a moulding to be manufactured under the effect of the heat and by the addition of an ecological propellant gas.
- The mouldings are made from extruded polyethylene.

- These products are not produced with CFC's or HCFC's.

### PROPERTIES

- Very good dimensional stability and exceptional precision in the design detail, credited to the continuous extrusion process and the high density.
- Visible surface tough, smooth and with precise edges.

- Gluing surfaces grooved to offer optimum bonding.

### SURFACE WORK

- To paint Nomastyl® products use solvent free acrylic or latex paints.

### PROFILE LENGTH

- 2m

# ACCESSORIES

## MITRE BOXES

### AD MITRE BOX

- For mouldings with a wall height of up to 28cm (11")
- Made out of plywood (w40 x h32 x d12cm)
- 2 adjustable brackets
- Cutting angles: 45°, 22.5°, 67.5° and 90°

STANDARD MITRE BLOCK

### VARIO MITRE BOX

- For mouldings with a wall height of up to 17.5cm (67/8")
- Made out of plywood with reinforced metal (w40 x h32 x d12cm)
- Cutting angles: 25°, 36°, 30°, 22.5°, 0° or 90°

## ADHESIVES

### DECOR-GRIP ADHESIVE

**USAGE:**  
 1 cartridge per 5-7 metres  
 of Cornice or Dado (approx.)  
 1 cartridge per 10 metres of panel moulding

### DECOR-GRIP PLUS ADHESIVE

Decor-grip plus (MS Polymer adhesive) use for jointing and adhering all coverings larger than 12cm x 12cm

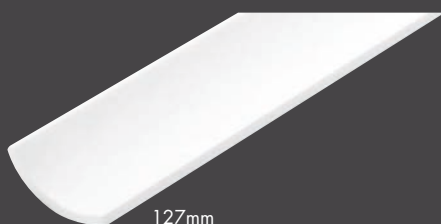

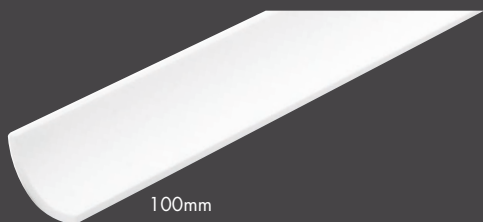

# Pro-Cove lite

## Faster than plaster

Pro-Cove lite - *Lightweight Trade Coving*

- **FASTER THAN PLASTER**  
Up to 3 times quicker to install
- **LIGHT**  
Lightweight for one person fixing
- **EASY**  
Fully paintable with no need to prime
- **QUALITY**  
Smooth paper faced precision finish
- **TOUGH**  
Modern high density polymer resists knocks

## NOMA® FIX

NOMA®Fix can be used to cover cracks and crevices in walls and to hide joints between plasterboard panels and insulating coverings such as Noma®Therm.

**Nominal dimensions:**  
Rolls measuring 50mm x 10m

## NOMA® INSULATION

noma<sup>®</sup>tap

Polystyrene underlay.  
For thermal insulation all around the house.

2 mm	4 mm	0,50 x 10 m

noma<sup>®</sup>therm

Polystyrene insulating layer bonded with cardboard for thermal insulation.  
Reduces heating costs and eases the application of wall-coverings.

3 mm	5 mm	0,50 x 10 m

## NOMA® THERM

READY

**Insulation and wallpaper in one product.** Thermal wall insulation covered with a layer of wallpaper.

4 mm	0,50 x 10 m	13 R 6 R

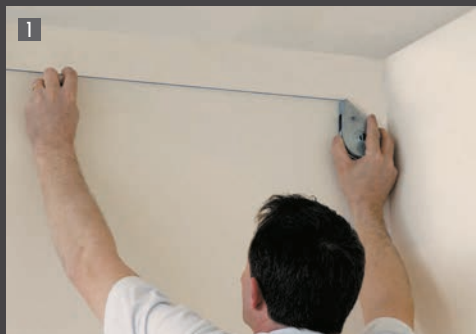

\*Regarding a wall thickness of 23cm

# INSTALLATION

## INSTALLATION INSTRUCTIONS

1 Using the marking line, mark the dimension along the perimeter of the room

2 Set the Mitre Box to the "wall height" of your moulding using the two reglets. The vertical wall of the mitre box represents the wall, and the bottom of the ceiling

3 Cutting the left-hand angle

4 Cutting the right-hand angle

Apply Decor-Grip or Plus to coving edge

Full and detailed installation instructions available to download on: [www.copleydecor.co.uk](http://www.copleydecor.co.uk)

5 Fixing left hand angle

6 Fixing right hand angle

Fill joint with Decor-Grip joint adhesive

# INSTALLATION

## CEILING CENTRE INSTRUCTIONS

- 1 When Installing a lamp be sure to cut a suitable hole in the centre
- 2 Apply the Decor-Grip on the surfaces to be glued
- 3 Fill the joint with Decor-Grip adhesive-filler

- 4 Press to squeeze out any surplus adhesive
- 5 Remove any excess adhesive and clean promptly with a damp sponge
